Schumacher Custom Saddles

110 Commercial Ave.
Wolsey, SD 57384
PH: 605-883-4554

I can build you the saddle of your dreams. A saddle that fits you perfectly that you can ride all day. Whether its ranch work or roping, or cutting, or barrel racing, or just riding the trails, I can build a saddle for you. Not only should a saddle fit you it should also fit your horse perfectly. I can fit one horse in particular or I can make the saddle so that it fits a certain type of horse. So if your horse is high withered or mutton withered I can make the saddle to fit him perfectly. Saddles not only should fit you and your horse perfectly, they should look good too. So whether it's a ranch saddle or a full carved performance saddle you can get the look you want.

Tooling patterns vary to the taste of the customer. I can make a saddle plain or full carve it in a variety of different flowers leaves or basket stamped.

½ Breed saddle built on a R.C. roper.

Many of my friends that rope, really like this tree. I've made two R.C. ropers for NFR qualifier Logan Olson. Logan likes the way the saddles fit his horses and the 14 ½ inch seat with longer fenders helps him get to the front of the saddle quicker so he can rope faster. No matter what your performance requirements are, I can make a saddle to fit your needs. Seat lengths from 12 inches to 18 inches. Fenders to match the length of your legs. Cantle heights 2 to 6 inches. Swell widths 8 to 14 inches. I can make the saddle just about any size you want.
