Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.045 Prices: GMO = \$3.50; non-GMO = \$3.50

Test Comments: *Very uniform test site at harvest. Some stalk lodging was noticed from deer activity in the full-season test but this was minor. Corn grain moistures are higher here than those we have seen at other sites this year due in part to over an inch of rain the area recently picked up. Tim, the farmer at this site, reported good yields in the area, similar to the test results.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
