**Test Comments:** *This area is having a record corn harvest as yields are approaching the 200 bushels per acre level. Unlike past years, this area caught some August rains that really helped boost yields. The test results were strong and show yields close to that 200 bushel mark. Surprised to see a lot of corn remaining to harvest in this area as of November 4th.*

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
